To: Nathalie Kamel
President, Lakeshore General Hospital Foundation

From: Dr. F. Ramadori
Chief, Department of Anesthesiology, CIUSSS-ODIM

2024-05-30

Dear Ms. Kamel,

I would like to thank the Foundation and its donors for supporting the purchase of the Sedline Patient Monitors and the TCI IV medication infusion pumps. The monitors and pumps have been in use daily in the OR since January, 2024, and have modernized the administration of general anesthesia, making it both safer for patients and more efficient, both in terms of OR time utilization and overall cost of care.

The additional monitors recently-installed in the ICU will also provide an increased level of patient safety. Some of these will also be deployed in the PACU, as well as in the planned additional operating room spaces. In-service of the ICU staff on the use of these monitors is being organised by our ICU nursing leadership, after which they can enter into clinical service.

The support of the foundation and its donors remains an essential contributor to the provision of high-quality care to our patient population.

With the gratitude of the Department of Anesthesiology and the Critical Care Program,

Frank Ramadori, MDCM, FRCPC, ABA(CCM), FCCP
